

Why is that a Pronghorn Buck on the *Runnin' Bucks* logo?

Simple -

Pronghorns are the greatest runners in the world!

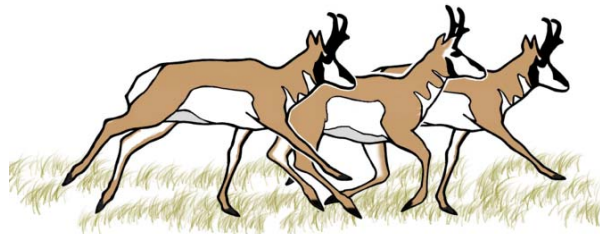

It's no contest!!

They can sprint as fast as 60 mph and
can sustain a speed of 35 mph *for miles!!*

Although the Cheetah is often credited with being the fastest, cheetahs are only sprinters that flag out after a few hundred yards.
No other land mammal can keep up with the Pronghorn over a longer distance.

Plus, these amazing speed merchants are local!
Pronghorns are found *only* in the American West, and you can see them anytime you cross the prairies around Alpine.

Cross Country runners are also a special breed –
So a special *Buck* for a special breed!

Go Runnin' Bucks!
